ABOUT ME

Hello world! I've been building my skills as a JavaScript developer for the past two and a half years. Now I'm eager to put these skills to good use. Check out some of my work!

SKILLS

- JavaScript
 - React (Hooks, Next)
 - Node.js
 - jQuery
- CSS
 - Tailwind
 - Bootstrap
 - SASS
 - Vanilla
- HTML
- Git
- Graphic Design
 - Adobe Photoshop
 - Adobe Illustrator
 - Adobe Lightroom

PROJECTS (VISIT [GITHUB](#) FOR MORE)

GULAG ANTHEM BLOG APP • NEXT.JS, TAILWIND • [GULAGANTHEM.COM](https://gulaganthem.com)

This blog app offers full CRUD operations for essays when a user has been authenticated. Firebase Firestore was employed for the backend. It hosts all information on essays and users. Creation of essays is facilitated with TinyMCE for formatting essay content. A mailing list is also implemented through Mail Chimp.

SEEKER • REACT, TAILWIND • [JACOBERRICK.GITHUB.IO/SEEKER/](https://jacoberick.github.io/seeker/)

Seeker retrieves a NFT (Non-Fungible-Token) asset using the NFTs contract address and token number. Seeker interacts with the OpenSea API to retrieve asset information. As with all my projects, Seeker is fully responsive from large screens to mobile.

KEYS • REACT, TAILWIND • [JACOBERRICK.GITHUB.IO/KEYS/](https://jacoberick.github.io/keys/)

Keys is a tool that determines what key a musical composition is in based off its employed chords. Keys stores, updates, and resets selected chords with the use of React Hooks. Keys was created with minimalistic and elegant design in mind. This was achieved through the utility first framework, Tailwind.

PORTFOLIO SITE • REACT, SASS, JQUERY • [JACOBWHITE.DEV](https://jacobwhite.dev)

A place to show off some of my work.

EDUCATION

AA DEGREE • MAY 2019 • NORTHWEST FLORIDA STATE COLLEGE

FULL STACK JAVASCRIPT TECHDEGREE • MAY 2020 • NORTHWEST FLORIDA STATE COLLEGE

JAVASCRIPT ALGORITHMS AND DATA STRUCTURES • SEP 2021 • FREECODECAMP

RESPONSIVE WEB DESIGN • SEP 2021 • FREECODECAMP
