JACOB E. WHITE

Franklin, TN 37064 | (850) 865-5014 | jacobewhitedev@gmail.com | https://github.com/jacoberick

SKILLS

Programming Languages

- JavaScript (Vanilla, jQuery, React), HTML, CSS (Bootstrap, Sass), SQL

Graphic Design

- Adobe Photoshop, Adobe Lightroom

PROJECTS

Jacob White's Portfolio Site - https://github.com/jacoberick/jacob-white-portfolio-site
- An app using React, Sass, jQuery, and HTML, that showcases some of my work.

Full Stack App with React and REST API - https://github.com/jacoberick/Full-Stack-App-with-React-and-a-REST-API
- An app that interacts with a RESTful API I created, that uses CRUD operations, hashes passwords, has validations, and sends back and forth status/error codes.
- Features sign up and sign in modules.

SQL Library Manager – https://github.com/jacoberick/Sequel-Library-Manager
- A book library manager that utilizes CRUD operations to interact with the database.
- Makes use of Sequelize models.

Object Oriented Programming Game - https://github.com/jacoberick/OOP-Game
- A guessing game made using JavaScript classes along with jQuery.
- This game was created for the Treehouse JavaScript Tech Degree program.

Interactive Form - https://github.com/jacoberick/Interactive-Form
- An Interactive form field created using JavaScript and jQuery.

List Pagination and Filtering – https://github.com/jacoberick/List-Pagination-and-Filtering
- An app that displays a list of users and organizes them into separate pages.
- Features a search bar that updates user list in real time.
